Boost Pedestrian Awareness of Automatic Swing Door Dangers

Sensitive accelerometer technology detects swing door movement and triggers an audio-visual signal warning pedestrians of door movement

- **Increase Door Danger Awareness**
Alert pedestrians to full powered automatic swing door movement with this audio-visual warning device
- **Compliance with BS8300 Part M1/M2 (UK Customers)**
"Visual & audio warnings are provided to warn people of automatic operation when both opening & shutting" i.e. during the swing door opening and closing cycle
- **Adjustable Audio/Visual Settings**
Audio signal volume and tone adjustable, visual LED frequency programmable to suit all installation environments
- **Miniature in Size**
Small and aesthetic design does not detract from door appearance
